In the event of discrepancy between the Declaration and the list above, the Declaration controls and the list above is amended accordingly.)

[xx] The inventors of the present application are the same as those on the prior application.

[ ] Please delete the following inventors who were named on the prior application, but are not inventors of the invention being claimed in the present application:

[ ] The following additional inventors are to be named on the instant application: \_\_\_\_\_

4. [ ] The benefit under 35 USC §119 is claimed of the filing date of: Application No. \_\_\_\_\_ in \_\_\_\_\_ on \_\_\_\_\_. A certified copy of said priority document [ ] is attached [ ] was filed in progenitor case \_\_\_\_\_ on \_\_\_\_\_.

5. [x] Certain documents were previously cited or submitted to the Patent and Trademark Office in the following prior application 09/069,827; and 08/740,671, which is relied upon under 35 USC §120. Applicants identify these documents by attaching hereto one or more form PTO-1449 and/or form PTO-892 listing these documents, and request that they be considered and made of record in accordance with 37 CFR §1.98(d). Per 37 CFR §1.98(d), copies of these documents need not be filed in this application.

While an IDS filed under §1.97 must contain a "list of all patents, publications or other information submitted for consideration by the Office", see §1.98(a)(1), the only requirement for the list is that it provide the information set forth in §1.98(b). There is no requirement that a form PTO-1449 be used (MPEP §609 merely says that use of this form is "encouraged") and no prohibition on submitting a copy of a form

PTO-1449 or form PTO-892 from a prior case. Indeed, the re-use of such forms is desirable as it avoids error in transferring the information, and evidences that the reference was considered in a prior application. A previously accepted PTO-1449, or an examiner-prepared PTO892, necessarily complies with §1.98(b).

6.  Sequence Listing

Applicants hereby submit the following:

a paper copy of a "Sequence Listing", complying with §1.821(c), to be incorporated into the specification  
 the Sequence Listing in computer readable form, complying with §1.821(e) and §1.824,  
 The computer readable form in this application is identical with that filed in application number \_\_\_\_\_ filed \_\_\_\_\_. In accordance with 37 CFR 1.821(e), please use the computer readable form filed in that case on or about \_\_\_\_\_ as the computer readable form for the instant application. It is understood that the Patent and Trademark Office will make the necessary change in "General Information", including changes in the application number and filing date, for the computer readable form that will be used for the instant application.

The undersigned attorney or agent hereby states that this submission is not believed to include new matter [§1.821(g)].

The description has been amended to comply with §1.821(d).  
 This application includes sequences first set forth in a prior U.S. benefit application filed before the effective date (October 1, 1990) of the sequence listing rules, and hence which need not be included in the sequence listing.

Continuation Application of USSN 09/069,827  
Our Ref.: FOWLKES=4D

[ ] This application sets forth only sequences first set forth in a prior U.S. benefit application, filed prior to the effective date (July 1, 1998) of the revised sequence listing rules, and hence need only comply with the original rules.

Under the revised sequence listing rules, each sequence must be classified in <213> as an "Artificial Sequence", a sequence of "Unknown" origin, or a sequence originating in a particular organism, identified by its scientific name. Neither the rules nor the MPEP clarify the nature of the relationship which must exist between a listed sequence and an organism for that organism to be identified as the origin of the sequence under <213>. The identification of an organism in <213> should not be construed as an admission that the sequence *per se* occurs in nature in said organism. Similarly, designation of a sequence as "artificial" should not be construed as a representation that the sequence has no association with any organism. The Examiner should be able to judge the relationship of the enumerated sequences to natural sequences by giving full consideration to the specification, the art cited therein, any further art cited in an IDS, and the results of his or her sequence search against a database containing known natural sequences.

7. If reliance is made on a declaration filed in a prior application, then

[X] The undersigned attorney of record hereby grants associate power of attorney to all attorneys associated with Customer Number 001444, to prosecute this application and transact all business in the Patent and Trademark Office.
